**LONGSTREETCLINIC**

LASER & AESTHETICS

Dahlonega

## **Botox & Dysport**

Muscle relaxing agents that visibly reduces and softens wrinkles and fine lines by temporarily relaxing specific muscles. The most common areas of treatment are frown lines of the forehead, crow's feet, and lines between the eyes.

## **Chemical Peel**

Customized chemical exfoliation that dissolves dead skin cells off the epidermis revealing fresh, new, bright skin. Chemical exfoliation helps to improve the appearance of photodamage, post-inflammatory hyperpigmentation, pore size, fine lines, and wrinkles.

## **Cryo Treatment**

Anti-inflammatory, antibacterial freezing procedure that calms problematic or acneic skin. This cooling treatment reduces the appearance of fine lines, wrinkles, hyperpigmentation, laxity, dullness, and imperfections.

## **Dermaplaning**

A simple, safe procedure for evenly exfoliating the epidermis and ridding the skin of fine vellus hair (peach fuzz). The result is a more refined, smooth, glowing appearance and is a great treatment to have prior to a big event.

## **Laser Hair Reduction**

A quick, noninvasive way to permanently reduce unwanted hair for both men and women. It can be performed on virtually all areas of the body where dark hair grows. Desired response typically seen in 3-6 treatments.

## **Photofacial**

Diminishes fine lines, pore size, redness, broken capillaries, sun damage, and pigmentation problems. Treatment targets pigment below the skin surface to reverse signs of aging and sun damage without requiring downtime of laser resurfacing. Photofacial Therapy also reduces redness caused by rosacea and improves acne.

## **Microneedling**

Stimulates natural collagen production while allowing micro channels to be created in the skin to increase topical nutrient absorption. This allows for treatment delivery deep into the skin's dermis. This treatment is perfectly paired with stem cell therapy.

## **Microneedling RF**

Combines micro-channeling and energy to the dermal layer of skin to initiate the rejuvenation response to stimulate collagen while lifting and toning simultaneously. Skin can feel and look tighter after the initial treatment as a result of the combined treatments.

## **Radiofrequency**

Non-invasive and FDA approved treatment that tightens, lifts, and tones the treated area. There is no downtime, and it can be combined with other treatments.

## **Stem Cell Facials**

AnteAge® stem cells are micro-channeled into the skin to deliver growth factors that stimulate collagen and repair activity to create facial rejuvenation. Pain free and no downtime. This treatment is recommended for sensitive skin.

## **PRX-T33**

Targets the dermal layer and causes inflammation to stimulate tightening and collagen production without having superficial down time. Clients leave with beautiful, glowing skin post treatment. It can be done throughout the year as it doesn't photosensitize the skin. No needles are used, and it is a pain-free procedure.

## **Medical Weight Loss**

Weight loss programs are physician supervised and include appetite suppressants and diet counseling.
