Cellulite	Lymphatic Draining/Massage
Eyes	Neck
Flanks	RF Massage
Full Facial	

## LATISSE

## SKINCARE PRODUCTS AVAILABLE FOR PURCHASE

Alumier MD (Medical grade, all organic)  
SkinCeuticals

# Glossary of Terms

**Chemical Peel** – A customized chemical exfoliation that dissolves dead skin cells off the epidermis revealing fresh, new, bright skin. Chemical exfoliation helps to improve the appearance of photodamage, post-inflammatory hyperpigmentation, pore size, fine lines, and wrinkles.

**Vibraderm** – Microdermabrasion is an innovative procedure to improve the skin's appearance. A non-crystal alternative to microdermabrasion, Vibraderm stimulates collagen production and exfoliates all areas of the face, neck, and body.

**Microneedling/PRP** – Stimulates natural collagen production while allowing fine channels to be created in the skin to increase topical nutrient absorption. This allows for treatment delivery deep into the skin's fibroblasts to feed the cells found in the dermis and basal layer.

**IPL/Photofacial** – Diminishes fine lines, pore size, redness, broken capillaries, sun damage, and pigmentation problems without requiring downtime of laser resurfacing. Photofacial Therapy also reduces redness caused by rosacea.

**ResurFX Fractional** – Skin resurfacing procedure used to reduce signs of aging and improve skin texture, laxity, and tone. Also used for scar and stretch mark reduction.

**Dermaplaning** – A simple, safe procedure for evenly exfoliating the epidermis and ridding the skin of fine vellus hair (peach fuzz). The result is a more refined, smooth, glowing appearance and is a great treatment to have prior to a big event.

**Laser Hair Reduction** – A quick, noninvasive way to permanently reduce unwanted hair. It can be performed on virtually all areas of the body.

**CoolPeel** – A brand new way to safely and comfortably deliver the benefits of a traditional CO2 resurfacing treatment. By targeting just the superficial layer of skin tissue, damaged skin is removed, revealing younger, healthier-looking skin.

**Tetra** – A CO2 laser that offers fully customizable skin resurfacing treatments that eliminate signs of aging like wrinkles, sunspots, uneven texture and age spots for dramatically smoother, brighter, younger-looking skin.
